

**TPMS Tools**

June 12, 2017

**Introduction**

Title:

**JUNE 2017 Software Update Version Release Notes**

TPMS Product(s):

**ATEQ VT36, VT46, VT55, VT56 and all branded versions of these devices**

The software update includes new OE coverage, improved programmable sensor coverage, new functionalities and corrections.

Les Clayes-sous-Bois, France: ATEQ is proud to announce its June software release.

**New versions now available:**

- VT36 version Hx1-10-XX
- VT46 version Jx2-07-XX
- VT56 version Dx1-20-XX
- VT55 version Cx2-20-XX

**Improvements and fixes:**

- VT36 and VT46: New Remote Key Entry (RKE) test available
- VT36 (European database only): An information indicating the relearn procedure is now displayed for each Make-Model-Year.
- VT56: The Wi-Fi function is now active for all users but kept as a “beta” section until September. ATEQ has made efforts to make this as easy as a smartphone set-up, but all European configurations could not be tested. Therefore some users may encounter compatibility issues due to non-standard Wi-Fi network set-up. Wi-Fi can be used to send jobs to a PC with the new Web VT 8.10 installed. The new Desktop software can be found here: [www.ateq-tpms.com/downloads](http://www.ateq-tpms.com/downloads).
- Minor text adjustments.
